

# FIND A DOCTOR OR LGS COMPREHENSIVE CARE CENTER

## What is a Neurologist?

Neurologists are doctors who specialize in treating diseases of the brain and spinal cord. To become a neurologist in the United States, one must graduate from medical school, then complete a neurology residency for four years.

## What is an Epileptologist?

Epileptologists are neurologists who specialize in caring for those with epilepsy. To become an Epileptologist, one must first become a neurologist and then complete an additional one or two years of epilepsy subspecialty training.

## Find a Doctor

Are you looking for a doctor who understands LGS?

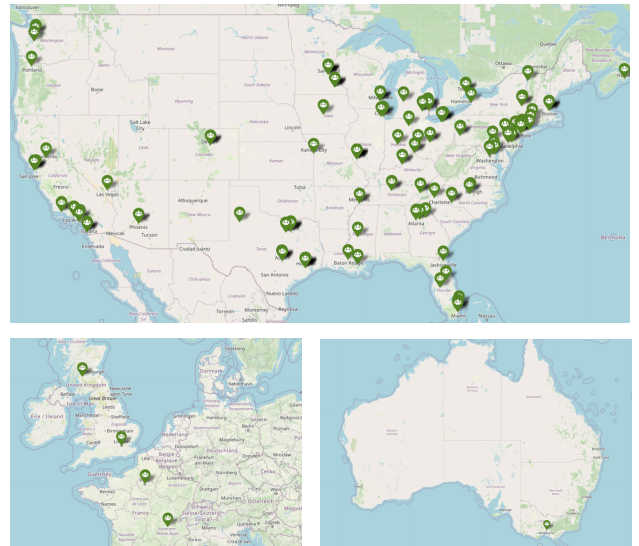

Check out our list of adult and pediatric providers.

The professionals listed have experience treating individuals with Lennox-Gastaut Syndrome and/or related disorders, and many come recommended by families in our LGS community.

## Find an LGS Comprehensive Care Center

Individuals with Lennox-Gastaut Syndrome have complex and lifelong neurological and medical needs that are unique. Often, a local care team is not familiar with LGS or may not have had another patient with this diagnosis. A visit to a Comprehensive Care Center will benefit the patient and family, allowing them to connect with knowledgeable experts and form a bridge to their local care provider when complex issues arise.

To qualify as an LGS Comprehensive Care Center, the center is expected to:

- Offer a multidisciplinary approach for the treatment of Lennox-Gastaut Syndrome
- Have a high concentration of expertise and related resources centered on LGS
- Demonstrate a strong knowledge base and familiarity with LGS
- Commit to furthering clinical knowledge of LGS through collaboration with others, including the LGS Foundation
- Have involvement in studies and/or clinical trials for Lennox-Gastaut Syndrome and are knowledgeable about new treatments and cutting-edge research
