

Medical Equipment

Our loved ones with rare epilepsy may have a variety of different types of equipment and devices to support their care and wellbeing. Please use the chart below to list any adaptive equipment, devices and durable medical equipment (i.e., walker, wheelchair, car seat/harness, C-pap machine, orthotics, iPad communication device, glasses, etc.).

TIP: Sometimes durable medical equipment also requires disposable medical supplies for use. See the [Supply Refills](#) section of this C.A.R.E. Binder. See the Attachments section of this C.A.R.E. Binder to add pages as needed.

Adaptive Equipment/Device	Who is involved? (for example, prescription from doctor or therapist)	How is it funded?	How often can/should it be replaced?	Is it owned or rented?	Company providing it and/or who to call for repairs/replacement	Additional Information
